Dental Hygiene Library Resources Assignment

This “hands-on” exercise is an introduction to the electronic resources available through the Dental Hygiene Subject Guide. While the purpose of this assignment is to provide exposure to resources available through the library, the questions do require a certain amount of searching and attention to detail.

Start at the Dental Hygiene Subject for every question (http://libguides.tri-c.edu/dental.) Do not use Google or any other search engine to answer the questions. Library resources cannot be accessed through Google.

Answer each question to the best of your ability and enter your responses into the Library Resources Assignment found on the Blackboard site for Dental Hygiene Summer Assignments under the Assignment button.

The assignment is due August, 27, 2018

1. Using the Dental Hygiene Subject Guide, list all print publications found in the library at Metro.

2. Using the Dental Hygiene Subject Guide, locate the article database CINAHL. Access the database and do a keyword search for nutrition and dental caries. How many articles are found?

3. Using the same search nutrition and dental caries use the drop-down menu and choose the option “MW Word in Subject Heading.” How many articles are found?

4. What is the difference in the search result numbers in the previous searchers?

5. From the results in the second search (question 3), click on the title of the article "Nutrition, Dental Caries and Periodontal Disease: A Narrative Review" and answer the following questions:
   - What journal (source) is the article in?
   - When was the article published?
• How many pages long is the article?

• What are the Major Subjects of the article?

6. Locate the full text of the article (FindIT) and attach a copy of the article here (use the paper clip icon).

7. Use the Cite button to copy and paste the APA citation of the article (go back to the CINAHL screen for this).

8. Using the Dental Hygiene Subject Guide, locate the full-text online journal titled, Journal of Dental Hygiene. Locate the Feb. 2018 issue of the journal and find the article General Dentists’ Perceptions of Dental Hygienists’ Professional Role: A Survey.” Open the article and read the abstract and explain what was concluded from the study.

What are three (3) interesting facts you found after reading/browsing the article?

9. Using the Dental Hygiene Subject Guide, go to the American Dental Hygienists Association website. Name four (4) interesting or useful things found there.

10. Using the Dental Hygiene Subject Guide, what two (2) resources are available to help Tri-C students write a paper?
