Respiratory Care

Before you begin...

- Create a document and call it Respiratory Care followed by your name.
- Follow these steps to get to the Tri-C Library Subject Guides:
  1. Log in to your my Tri-C Space account.
  2. Click Student on the left.
  3. Find and click the link for the Library (under Academic Support) to go to the library home page.
  4. Click the orange box labeled Subject Guides.

  Tip: Tri-C has at least one Subject Guide for any subject you can study at Tri-C. Always start with a subject guide when doing research.

1 Topic

1. Choose one of the following topics to work with for this activity:
   - asthma, COPD, croup, cystic fibrosis, emphysema, pertussis, pneumonia, pulmonary hypertension, sleep apnea, or tuberculosis.

2. Type the topic in the document you created.

2 Article

1. In the alphabetical list of subject guides, find and click Respiratory Care, then click Respiratory Care.
2. In the Articles tab, click CINAHL.
3. Click the Search button.
   - Select an article from the result list by clicking the title.
4. Get an AMA citation for the article. To do this: Click Cite (right side under Tools), then scroll the box in the middle of the page to find the AMA citation.
5. Copy and paste the citation into your document.

3 Book

1. Click the “Resources – Respiratory Therapy” tab to go back to the Subject Guide.
2. In the Library Tools box, click Encore—Tri-C’s Library Catalog.
3. Type your topic in the search box and click the arrow to search.
4. Click the OhioLINK logo (top right) to view books at Ohio academic libraries.
5. Select a book on your topic by clicking the title.
6. Copy and paste the book title, author, name of publisher, and publication year of the book into your document.

4 Website

1. Click the “Resources – Respiratory Therapy” tab to go back to the Subject Guide.
2. In the Google Search Engine box, click the link for Google.
3. Type your topic in the search box and click the arrow to search.
4. To find quality websites, look for sites from the .gov, .edu, or .org domains with the site command. Here’s an example: bronchitis site:.gov
5. Copy and paste the website title and the URL into your document.
   - (The website title is important because it would be required in a citation for a website.)
